## More Information

This and the following ten drawings, variously dated 1979 or 1980 or undated, may have been started towards the end of 1979 and finished in 1980, which would account for some having been given a 1979/80 dating when they were first catalogued. It is also possible that some may have been misdated by Moore. The date given in the original cataloguing has been retained.
